JOBS TRACKER · BY WORKWIZ

The office gets Friday back.

Field operations for UK and Irish trades contractors with 10 to 60 engineers: dispatch, timesheets, RAMS, fleet and payroll in one system, already running every day at CBES.

Pre-seed · October 2026 · Workwiz Limited, UK

Confidential

THE PROBLEM

A 30-engineer contractor runs on four tools that don’t talk, and one person who re-types between them.

Spreadsheet schedule

Rebuilt every Monday. No live view of who is actually on which site.

WhatsApp dispatch

Missed messages, no record of what was agreed, photos sorted by hand.

Paper RAMS

Signed in the van, lost in the van. No proof the worker read it when the HSE asks.

Friday payroll

Every engineer’s hours typed into Sage by hand. Hours gone, errors compounding, variations never invoiced.

The cost is not a software bill. It is the project manager’s week, the client call-backs, and the extra work that never reaches an invoice.

Source: CBES discovery and 18 months of field deployment

THE PRODUCT

One platform, two apps, live between them.

OFFICE · DESKTOP

Planner, manager, payroll

- Reactive job booked in 30 seconds, while the client is still on the phone
- Drag-and-drop weekly planner with conflict and leave checks, per-worker days
- Live van map: who is where, which job, tapped in or not
- Timesheets approved → Sage payroll import; paid leave, rounding, corrections
- RAMS templates, signing log, client weekly reports, full audit trail

WORKER · IOS AND ANDROID

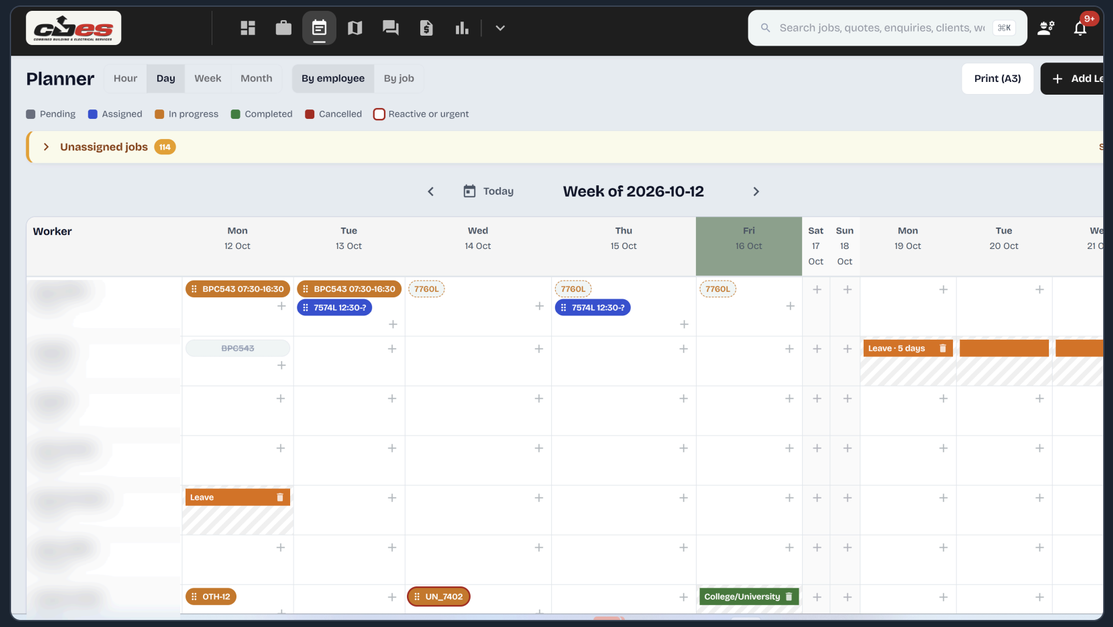

Today’s jobs, three taps

- Start route · Arrived · Tap out. The timesheet writes itself
- RAMS gate: nothing starts until it is signed on the phone
- Photos, materials against the delivery note, variations logged on site
- Works offline on site Wi-Fi; syncs when signal returns
- In the App Store (approved 14 Oct 2026) and Google Play

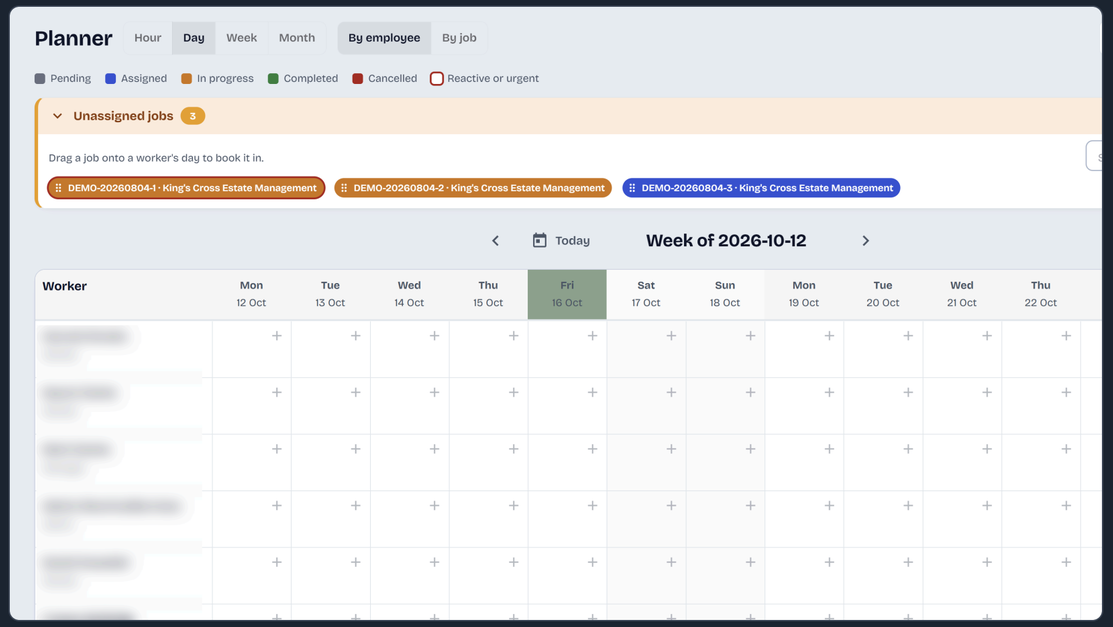

.NET 9 · React · Azure · multi-tenant, per-company branding and modules · SignalR real-time

IN PRODUCTION

The planner the office runs the week from: book a job in one drag, see the week in one screen.

CBES planner, this week: drag an unassigned job onto a worker's day; conflicts, leave and training are checked on drop. Staff names blurred.

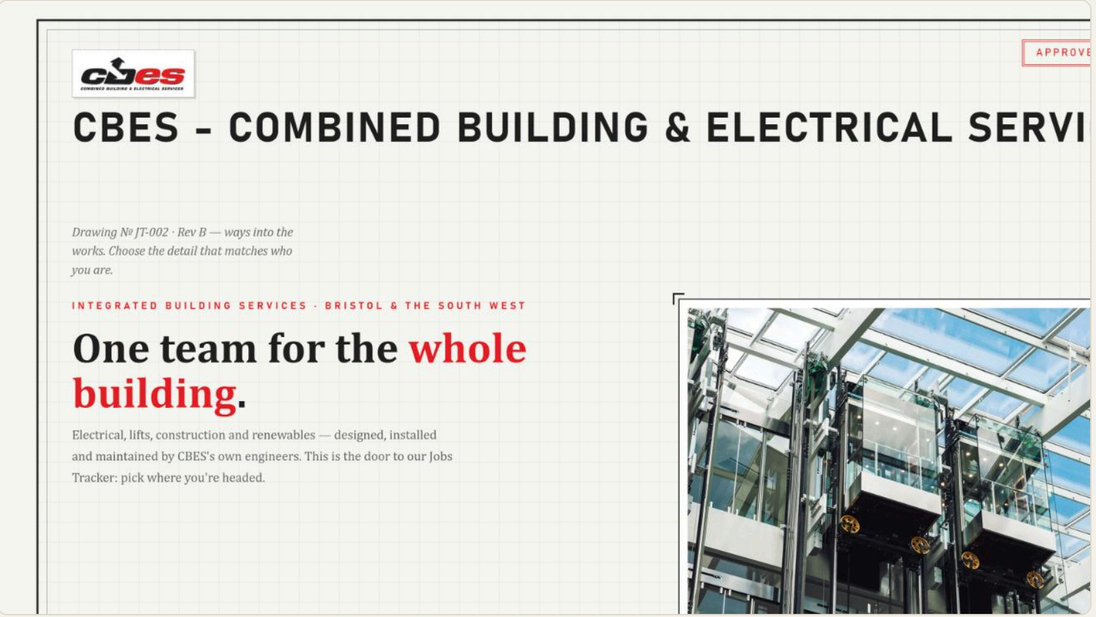

Unassigned jobs: drag one onto a worker's day to book it. Timesheet, RAMS gate and client report follow from that one action.

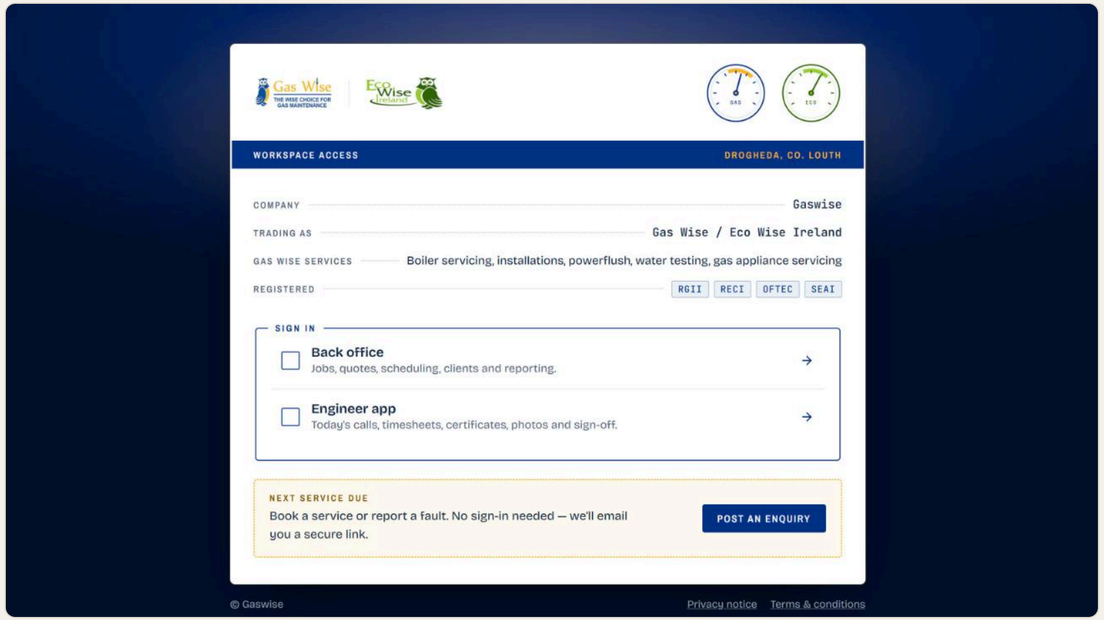

Worker app: fully released on iOS (App Store, approved 14 Oct 2026) and Android (Google Play). Phone screens on request or in the live demo.

MULTI-TENANT

Every customer gets its own front door, in its own brand.

cbes.jobstracker.work — Bristol building and electrical contractor; live since August 2026.

gaswise.jobstracker.work — gas and heating services, Drogheda; onboarding, go-live end of November 2026.

One codebase, one deployment; each tenant has its own subdomain, branding, modules and public enquiry form. Set up in days, not months.

PROOF

CBES has run its whole field operation on it since August 2026.

30
field engineers clocking in daily

4
office users planning and approving

3
months in production, every working day

15h+
office hours saved every week

Before	Now
Excel schedule re-typed every Monday	Drag-and-drop planner, conflict-checked, per-worker days
Paper RAMS signed and lost in vans	Signed on the phone before tap-in; signing log for audit
Hours typed into Sage by hand on Friday	Approved timesheets exported to Sage payroll in one step
“Where’s the van?” calls every hour	Live map, click a van for driver, site and status

> “Implementing Jobs Tracker has been a game-changer for our operations, delivering significant time savings and bringing a new level of clarity and structure across the entire business.”

Tracey Colwill
CEO, CBES Group

Combined Building & Electrical Services, Bristol. Figures from CBES, October 2026.

TRACTION

Three months live. One company paying, a second onboarding at list price, a third in discussion.

MRR FROM 1 NOV 2026

£3.0k

Gaswise £2,600 at list; CBES £440 net of a 60% first-year pilot discount

CUSTOMERS

2

paying and onboarding; one more in discussion

FIELD WORKERS

100

across CBES and Gaswise

MOBILE APP

Live

iOS App Store and Google Play, fully released

Company	Sector	Workers	Status
CBES	Building & electrical contractor	30 + 4 office	In production since August 2026; £1,100 list, 60% pilot discount in year one; drives the roadmap
Gaswise	Gas and heating services, Ireland	~70	Agreed at list price, £2,600/month from 1 Nov 2026 plus £4k set-up; subscription agreement being signed; data import under way
Ethical Power	Solar EPC and O&M	—	In discussion; ~£4k MRR with their team on board

Figures from invoices and agreed order forms, October 2026. CBES is in Bristol; Gaswise in Drogheda, Ireland: same product, two jurisdictions. No growth rate shown: three months is not a trend.

WHY NOW

The small contractor has a smartphone in every van and nothing built for its office.

Compliance moved to the phone

RAMS, CDM duty-holder records and site evidence are expected digitally by main contractors and insurers. Paper is becoming a liability at tender.

Payroll is the pain they will pay for

Sage still runs the trades. Nobody in the field-service market owns the timesheet-to-payroll step for a 30-person firm; it is done by hand.

Incumbents went upmarket

The established suites price and sell for 100+ engineer firms. The 10 to 60 band is too small for their sales teams and too complex for a spreadsheet.

Workers already carry the device. Office managers already know the pain. What is missing is a product priced and built for their size, and a company willing to sell to them one at a time.

MARKET

Tens of thousands of UK firms the size of CBES. We need three hundred.

UK FIRMS WITH 10–49 EMPLOYEES, ALL SECTORS

220,085

Business Population Estimates, start of 2025

CONSTRUCTION SHARE OF UK SMES

16%

885,000 construction SMEs, the largest sector

ADDRESSABLE: TRADES FIRMS, 10–60 FIELD STAFF

~30,000

Estimate: 16% of the 10–49 band, before adding gas, M&E and FM firms classed outside construction

300 firms at a CBES-sized contract (£1,100 a month at list price) is **£4.0m ARR**, about 1% of the addressable base. That is the seed-round proof point, and it is a sales problem, not a market problem.

Sources: GOV.UK Business Population Estimates 2025 (Table C; sector shares). The ~30,000 is our derivation, not a published figure, and counts the UK only; Ireland (Gaswise) is additional.

BUSINESS MODEL

Per login, per month. Published, and the same for every new customer.

£30
per field-worker login a month. Van GPS tracking included, not charged twice.

£50
per admin login a month: planners, managers, payroll.

£4,000
one-off set-up: RAMS templates, Sage mapping, data import; 25 GB of photos, video and documents included.

Packs
Storage packs, SMS credits, AI quote-writing at £5 per field worker a month: ~14% of recurring revenue by year three.

What a customer pays at list price	Monthly	Year 1	Year 2+
30 workers + 4 office (a CBES-sized firm)	£1,100	£17,200	£13,200
70 workers + 10 office (a Gaswise-sized firm)	£2,600	£35,200	£31,200
Hosting per customer (Azure, multi-tenant, at 50 customers)	~£40	~£480	~£480

Rate card approved October 2026 and shown on jobstracker.work. Both customers contracted at list; CBES carries a 60% first-year pilot discount, Gaswise none.

COMPETITION

The suites sell up. The apps stop at the job sheet. Nobody owns payroll for the 30-man firm.

Alternative	Built for	Where they are strong	Where we win
Simpro · BigChange · Joblogic	100+ engineer firms, enterprise sales cycle	Breadth, brand, integrations, account management	Price per worker, onboarding in days not months, payroll depth
Tradify · Fergus · Commusoft	Sole traders to small teams, quoting and invoicing	Simple, cheap, self-serve	Planner for 30 people, RAMS gate, fleet map, Sage payroll, multi-tenant branding
FleetSmart and telematics	Vehicles	Tracking hardware and dashboards	We connect to their trackers and own the job, timesheet and payroll on top
Spreadsheet + WhatsApp + Sage	Everyone, by default	Free, familiar, nobody gets fired for it	One source of truth, audit trail, the Friday that comes back

Payroll depth

Timesheet → approval → Sage import, with per-worker days, leave, rounding and corrections built from a real payroll office's requests.

Compliance by default

RAMS gate enforced server-side; signing log; every pay- or safety-relevant change audited with old and new values.

Built with the customer

Eighteen months of CBES "running queries" shipped as features. Incumbents cannot do that for a 30-person account.

Competitor positioning from public websites, October 2026; no pricing claims made about third parties.

GO TO MARKET

Sold one office manager at a time, with our own marketing engine behind it.

1

Referrals

CBES and Gaswise each know twenty contractors like themselves. Named introductions, case study in hand.

2

Trades sales hire

One UK-based person from the trades, hired within 60 days of close. Target mix at full ramp: 5 firms of 15–30 workers, 2–3 of 30–50, 1 of 50+ a month.

3

CampaignBuilder, in-house

Our own platform: lawful prospect sourcing by trade and region, e-mail sequences with AI-handled replies, and automatic posting to LinkedIn, Facebook and Instagram.

4

Where they already are

Trade bodies and events in the UK and Ireland, Sage accountants who serve contractors, the app stores, paid search on the pains. A US reseller relationship waits until the UK motion is proven.

Sales cycle: 30–90 days; the office manager decides, the owner signs. **Onboarding:** one week with the £4,000 set-up; every firm pays it. **The difference between the two funding options** is marketing to fill the pipeline and an onboarding hire to clear it: 9 new firms a month by month 12 with one salesperson, 16 with the full plan.

Every customer so far came through a relationship; the round funds the first repeatable channel and the marketing to feed it.

TEAM

One founder built it to production. The round builds the team around it.

FOUNDER & CEO

Franck Merlin

- 30 years in software; 10 of them integrating back-office systems for London local authorities
- Founded MagicBooking in 2016: UK booking platform, 1 million parents, over £260m processed, revenue above £2m a year; now run day to day by its technical director and COO
- Workwiz Limited since 2003; several SaaS products built and run on Azure, 15+ years on the platform
- Since 2024 builds with AI-assisted engineering: how one person took Jobs Tracker from design to App Store release
- Based in Malta, in the UK monthly; customers served in UK hours

TODAY

Founder-built, end to end

Jobs Tracker is written, tested and shipped by the founder alone. Playwright end-to-end suites and recorded customer test runs guard every release. That is the proof of execution and the key-person risk, both.

FUNDED BY THIS ROUND

Three hires

- Two full-time developers, .NET and React, dedicated to Jobs Tracker
- One UK trades sales and customer-success lead
- Fractional finance; advisers for the round

The first developer starts within 60 days of close; by month six the product ships without the founder in the loop on every change.

THE TWELVE-MONTH PLAN

One salesperson gets to nine new firms a month by month twelve. Marketing gets there by month seven.

Month after close	M4	M6	M9	M12	Set-up fees, year 1
OPTION A · £500K · REFERRALS + ONE TRADES SALESPERSON					
New firms that month	2	4	6	9	
Companies on the platform	4	11	27	**51**	**£195k**
MRR	£5k	£13k	£32k	**£60k**	
OPTION B · £1M · THE SAME, PLUS NATIONAL MARKETING AND AN ONBOARDING HIRE					
New firms that month	3	7	11	16	
Companies on the platform	5	17	45	**88**	**£345k**
MRR	£7k	£20k	£53k	**£100k**	

Assumptions: salesperson starts month 2, first closes month 4 on a 30–90 day cycle; average new contract £1,150 a month (a mix of 15–30, 30–50 and 50+ worker firms at list price); new sales grow 15% a month from month 7; £4,000 set-up on every firm. CBES and Gaswise included from month 0.

Targets, not forecasts: there is no repeatable channel yet. Set-up fees are cash in year one and are not in MRR.

YEARS TWO AND THREE

A second salesperson in year two, a third in year three; add-ons grow with every month a customer stays.

Year end	A · Y1	A · Y2	A · Y3	B · Y1	B · Y2	B · Y3
New firms a month, average	4	12	18	7	24	36
Companies on the platform	50	180	364	85	348	718
Add-ons as share of recurring revenue	3%	10%	14%	3%	10%	14%
Revenue in the year, incl. set-up fees	£0.5m	£2.5m	£5.5m	£0.8m	£4.7m	£10.7m
ARR run-rate at year end	**£0.7m**	**£2.8m**	**£6.0m**	**£1.2m**	**£5.4m**	**£11.8m**

Add-ons: usage that grows with tenure

Every firm starts with 25 GB; photos, video and documents outgrow it. Storage packs (£20 per 50 GB), SMS credits, and AI quote-writing and spelling at £5 per field worker a month, so the engineer on site writes the quote. Adoption 30% in year one, 60% by year three.

What the model assumes

Average new contract £1,150 a month at list; 1% monthly churn; 3% uplift at each renewal; £4,000 set-up on every firm. Either option needs a seed round during year two to fund the year-three sales and onboarding team.

Targets, not forecasts. Year-three Option B is about 2.4% of the ~30,000 UK firms in range, before Ireland.

THE ASK

Two options. Same team, same product; the second buys national reach in year one.

Use of funds, 15 months	Option A · £500k	Option B · £1m
Two developers, dedicated	£200k	£200k
UK trades sales / customer success	£80k	£80k
Integrations: Sage API, telematics, stores	£50k	£50k
Marketing: CampaignBuilder outbound, trade bodies, events, paid search, content	£50k	£450k
Onboarding and customer-success hire (B only)	—	£50k
Legal, finance, hosting growth and contingency	£120k	£170k
Month 12: companies · MRR · set-up fees banked	**~51 · £60k · £195k**	**~88 · £100k · £345k**

OPTION A

One trades salesperson from month 2; nine new firms a month by month 12, ~£0.7m ARR run-rate. Seed round in 2028 on proven unit economics.

OPTION B

Marketing from month 3 fills the pipeline, an onboarding hire clears it: sixteen new firms a month by month 12, ~£1.2m ARR run-rate.

Vehicle: Workwiz Limited (UK, 04999377), owner of the Jobs Tracker IP and contracts. Ordinary shares, same class as the founder's; board seat or observer for the lead. Not SEIS/EIS: the company predates the schemes' age limits.
