

A smarter platform for Irish gas & heating operations

For over 20 years Gaswise has grown into one of Ireland's largest domestic gas service providers — running planned boiler servicing and reactive breakdowns for domestic, commercial and social-housing clients across the Republic. **Jobs Tracker is built to run exactly this kind of operation:** a growing field fleet, compliance-heavy work to RGII standards, and council & housing-body contracts that demand a complete audit trail — all delivered from one mobile-first system.

— WHY JOBS TRACKER

More jobs from the same fleet

An AI dispatch optimiser plans assignments and routes automatically — not manual drag-and-drop — so a growing fleet covers more calls per day with less office effort.

Payroll & billing you can defend

GPS tap-in / tap-out with accuracy grading and automatic journey reconstruction. Engineer hours and mileage are **evidenced, not estimated**, with configurable travel-time rules.

Compliance ready for gas & social housing

Digital job forms and checklists, RAMS signed on-device before work starts (with AI-assisted drafting), geotagged photos and client sign-off — a full audit trail for RGII work and council / housing-body reporting.

Carbon & ESG that wins tenders

Automatic per-job, per-van and fleet emissions, plus per-client Scope 3 reports — directly supporting Gaswise's emissions-reduction positioning and SEAI-aligned work.

— BUILT AROUND HOW YOU ACTUALLY WORK

Planned & reactive, one board

Schedule annual services and dispatch emergency callouts from the same planner, at hour / day / week / month scale, with an unassigned-jobs queue for same-day work.

Real-time office ↔ engineer

Two-way messaging, live job status, site notices and parts flagged back from the field — the office always knows where every job stands.

Purpose-built for Irish field service — and ready for Gaswise today

Mobile apps for iOS & Android, an installable web app, and Sage / Xero-ready exports for your finance team.

HOW JOBS TRACKER COMPARES

CAPABILITY	JOBS TRACKER	TYPICAL FIELD-SERVICE SCHEDULER
Scheduling & dispatch	✓ AI route & dispatch optimiser	Manual drag-and-drop
Engineer time capture	✓ GPS tap-in / out with accuracy grading	Manual entry or status flags
Timesheets	✓ Location-verified, travel rules, one-tap submit	Basic manual timesheets
Journey & mileage	✓ Auto-reconstructed from GPS, per worker-day	Not available
Health & safety	✓ RAMS signed on-device + AI RAMS drafter	Generic checklists
Field forms & photos	✓ Configurable forms, geotagged photos, e-signature	Basic photo & note capture
Office ↔ engineer	✓ Real-time two-way messaging	Notes only
Carbon & ESG	✓ Per job / van / fleet + client Scope 3 report	Not available
Mobile experience	✓ Native iOS & Android + installable web app	Single app, limited resilience
Branding	✓ Fully white-labelled to Gaswise	Vendor-branded
Pricing	✓ Transparent, self-serve, free trial	Quote-only, on request

WHAT WE CAN OFFER GASWISE

- **A mobile-first platform for your engineers across the Republic** — today's jobs, in-app directions, and full on-site capture from one phone, whether they're in Louth, Dublin or beyond.
- **Planned servicing and reactive breakdowns in one system** — annual boiler services and emergency callouts managed on the same board, so nothing slips between the two.
- **Audit-ready compliance for council & housing-body contracts** — every job carries its forms, RAMS, geotagged photos and client sign-off, ready to evidence to any client or regulator.
- **Your brand, not ours** — the engineer app and client-facing views carry the Gaswise identity, reinforcing your 20-year reputation.
- **A fast, low-risk switch** — self-serve setup, a free trial to prove it on your own jobs, transparent pricing, and Sage / Xero-ready exports for finance.

See it on your own jobs
