

PERFORMANCE ENR

Developer of photovoltaic and energy solutions

Performance ENR supports businesses, local authorities and agricultural operators in developing innovative photovoltaic projects, from the feasibility study through to the commissioning of the installations.

Our expertise covers the entire value chain:

- Development of photovoltaic projects
- Technical studies and system sizing
- Administrative procedures and grid connection (ENEDIS / EDF SEI)
- Construction and works supervision
- Support through to entry into operation

Key figures

€430,000 in revenue in 2025

€600,000 in revenue achieved as at 1 July 2026

15 MWp of projects in development (S21)

5 MWp of projects under construction in Corsica (S24)

Our team (8 people)

Management	Development	Technical	Sales
Boris Fabié <i>President</i>	Séverine <i>Office Manager</i>	Éric <i>Design & Engineering Office</i>	Florian <i>Sales — Mainland</i>
Pierre Siméon <i>Managing Director</i>	Nathanaëlle <i>Development Assistant</i>	Nicolas Zalik <i>Construction Director</i>	Vanessa <i>Sales — Corsica</i>

Our ambitions

Our areas of development

☀ Photovoltaic development

Performance ENR continues to develop photovoltaic power plants on buildings, solar carports (canopies) and ground-mounted plants, to support the energy transition of local areas.

🌱 Agrivoltaics

Faced with growing demand from agricultural operators and local authorities, Performance ENR develops agrivoltaic projects that reconcile:

- maintaining agricultural production;
- enhancing the value of farm holdings;
- producing local renewable energy.

⚡ Eco Grid

Performance ENR is preparing to roll out **Eco Grid** solutions, combining:

- photovoltaic generation;
- battery storage;
- intelligent management of consumption;
- self-consumption optimisation;
- smart management of energy flows.

The aim is to offer comprehensive energy solutions capable of producing, storing and consuming energy in a more autonomous and more efficient way.

Our vision

To become a benchmark player in comprehensive energy solutions, delivering innovative photovoltaic, agrivoltaic and Eco Grid projects on the French mainland and in Corsica.
