Jobs Tracker

Field operations software
for UK trade and maintenance contractors

OFFICE + FIELD, ONE SYSTEM

From dispatch to done. Every step under control.

Jobs Tracker connects your office to every engineer and every van. **Planning, live tracking, site work, safety, materials, costs and timesheets** live on one job record, from the first call to the final sign-off.

Lift maintenance · Building services · Electrical · Gas & heating · Commercial plumbing · Emergency repairs · Social housing & compliance

One job. The whole journey.

Travel, site work, materials, costs and timesheet, all in one place.

1. **Plan & dispatch** — Drag jobs onto the planner. Clashes with leave, training and other bookings are flagged.
2. **Live van tracking** — Vans, jobs and engineers on one live map, using the trackers you already have.
3. **Execute** — RAMS signed before work starts. Checklists, photos and notes sent from site.
4. **Materials & extras** — Materials, costs and variations logged with PO numbers as they happen.
5. **Timesheets** — GPS tap-in and tap-out builds the week. Approve it, then export to Sage or Xero.
6. **Complete** — Client signature, completion photos and a PDF job report, all on one record.

FOR THE OFFICE

See it.

Where every van is, who is on which job and what is still unassigned, **live, without a phone call**.

FOR COMPLIANCE

Prove it.

Signed RAMS, GPS-stamped photos, client signatures and **a full audit trail of every change**, ready when a client or inspector asks.

FOR THE ACCOUNTS

Bill it.

Extras and materials captured on site, and approved timesheets that **go straight into Sage 50 or Xero**.

What it replaces

~~Paper job sheets~~ · ~~WhatsApp job groups~~ · ~~Planning spreadsheets~~ · ~~A separate tracker login~~ · ~~Chasing timesheets on a Friday~~ · ~~Re-keying hours into payroll~~

See your own jobs in Jobs Tracker.

All features overleaf

Jobs Tracker

The office and the field.
Working as one.

Everything included. Nothing bolted on.

One system for planners, managers, payroll and engineers. Each person sees what their role needs.

Planning & dispatch

- **Drag-and-drop planner**: hour, day, week and month views
- Crews and multi-day jobs, with each worker's days planned
- Flags clashes with leave, training and double bookings
- Dispatch suggestions AI
- Job checklists, with photo steps where needed
- Printable planner and PDF job cards

Enquiries & quotes

- Enquiry form and API from **your own website**
- Shared enquiry inbox with documents and threads
- **Enquiry → quote → job** without re-keying
- Quotes reviewed, sent, then accepted or rejected
- Win and loss reporting, plus CSV export

Clients, sites & assets

- Clients with merge and **Companies House** lookup
- Postcode address lookup
- **Many sites per client**, imported from a spreadsheet
- Bulk jobs from a client's property list
- Appliance register with service due dates

Health & safety

- Your RAMS and H&S templates, or import a PDF
- RAMS drafting AI
- **Work stays locked until the required RAMS are signed**
- Signing log: who signed, when, where, and what they ticked
- Exemptions set per worker

Timesheets & payroll

- Built from **GPS tap-in and tap-out**, rounded to 15 minutes
- Submit and approve; every office change audited
- Your travel and pay rules, bonus, half days
- Flags work on jobs a person wasn't planned on
- **Sage 50** payroll and project exports; **Xero** timesheets and invoices

Fleet & live tracking

- **Live map** of vans, jobs and engineers
- Works with **FleetSmart, Radius Kinesis and Geotab**
- Each van linked to its worker
- Shows who hasn't tapped in, and whether their van has moved
- Daily journey viewer, plus a vehicle defects register

People, leave & training

- Leave types, requests and balances
- **Training matrix** with certificate expiry alerts
- Certificates on the engineer's phone, ready to show on site
- Four roles: Worker, Planner, Admin and Manager

Carbon & ESG

- **CO_2 per job and per van**, by week or month
- Monthly fleet report in Excel or PDF
- Annual carbon report
- **Scope 3 PDF for each client**, for tenders and frameworks

Communication

- **Job chat** between the office and site
- Email templates, sent from your own company address
- In-app and push notifications
- SMS alerts, with SMS packs bought from inside the app
- Job notes proofread AI

Reports & control

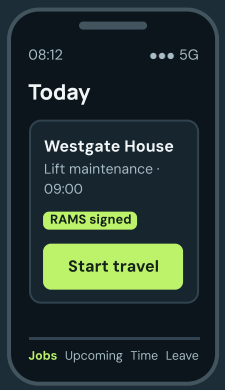

- Office dashboard and **control-room overview**
- Reports on weekly work, clients and quote outcomes
- **Full audit log** of changes, with filters
- PDF job reports with photos and signatures

Your brand, your way

- **Your own web address**, logo, colours and typeface
- Your branding carried into the office and worker apps
- Your own job types and work statuses
- Several offices or depots, each with its operating base
- GDPR data export

Switch on when you need them

- Weekly van checks and defect reports
- Reminders to tap in, tap out, and when the van is moving
- Extra SMS and storage packs
- Projects edition for multi-phase work
- Additional integrations, quoted per project

WORKER APP · IPHONE & ANDROID

The whole working day. In your pocket.

Less back-and-forth with the office. More work moving forward.

- ✓ Today's and upcoming jobs
- ✓ Google Maps or Waze
- ✓ GPS tap-in and tap-out
- ✓ Read and sign RAMS
- ✓ Photos, notes, job chat
- ✓ Materials, extras, POs
- ✓ Client signature
- ✓ Weekly timesheet
- ✓ Leave and training certificates
- ✓ Push alerts, biometric sign-in
